# INNOVATIVE AGEING CONFERENCE

Rapid population ageing has resulted in an influx of science and technologies in health and science that offer innovative solutions for older people. This conference will focus on the future of care to support active ageing, smart health technologies, socio-environmental innovations within homes, facilities or municipalities. This is aimed not only to improve wellbeing and life expectancy of older people but also promote successful ageing-in-place. It will provide a platform to showcase how the multi-dimensional needs and priorities of older persons can be enhanced by modern innovations and solutions created by established and emerging scientists in the field.

## Objectives:

1. To increase awareness and provide information on current advancements of science and technology in the areas of health and social environments.
2. To showcase innovations in health, social and environmental technologies that enhance the wellbeing of older persons.
3. To provide practical, affordable and sustainable solutions in the day to day living of older persons.

## Organisers

GERONTOLOGICAL ASSOCIATION OF MALAYSIA

Gerontological Association of Malaysia (GeM) was founded in 1991 with the aim of promoting national awareness on old age and ageing issues and concerns. It is a professional fraternity of individuals who are working in or interested with the field of gerontology – a multi-disciplinary discipline that examines the biological, medical, psychological, social, economic, cultural, technology and environmental aspects of human ageing. GeM is a registered body with the Registrar of Societies and is managed by an elected Executive Committee.

GeM is affiliated with the International Association of Gerontology and Geriatrics (IAGG).

Founded in 1986, the Malaysian Invention and Design Society (MINDS) is the largest body in Malaysia representing individuals, universities and companies who pursue excellence in invention, creativity, innovation, research and development, and industrial design.

MINDS is responsible for promoting high standards of invention and design, fostering professionalism and encouraging continuing professional development amongst its members.

MINDS is a member of the International Federation of Inventors' Association (IFIA).
